3rd GRADE NEWS

FROM OUR S

Thank you to all the wonderful parents who came and joined us for Career Day today! We loved learning about all the different occupations and all the hard work that goes into each job!

Next week is already the last week in October! Don't forget about SOCKTOBER. Please send in any new socks with your child to be placed in the collection boxes all over school so that Interact can donate them to families in need.

Next week we also have Book Character Day! Your child may dress up as their favorite book character all day. Please remember no weapons or masks are allowed at school. We encourage your child to bring the coordinating book with them. Please make sure your child is comfortable all day, as they will not have time to change clothes.

Lastly, our administration and cafeteria staff have stressed the importance of refillable water bottles at lunch time. Please send your child to school with a refillable water with their name on it- in efforts to help eliminate plastic cup waste and help save our Earth!

Car Trivia for Review at Home...

- Math: Ask your child to make up multiplication or division story problem. (Multiplication problems should have equal groups of something, and division should be splitting up/ sharing something equally) **See our unit 2 letter if you are looking for examples!
- Reading: Have your child share their reading goal with you and ask them how they plan to get better.
- Writing: Encourage your child to use transition words when telling you a story or making a list (First, next, because, also, however, etc)
- Social Studies: Have your child talk to you about the different European explorers explaining their struggles and accomplishments. Please keep in mind this review is important for their upcoming test!

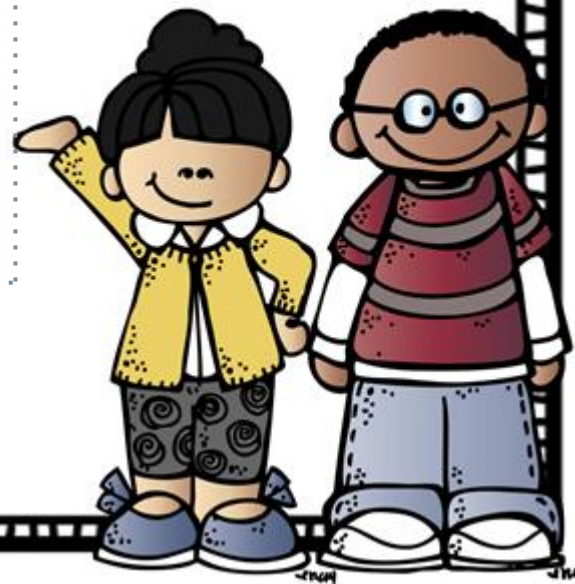

A PEEK AT OUR UPCOMING WEEK

3rd GRADE NEWS

WHAT'S HAPPENING IN...

Math

Students will take another week to review all the strategies to tackle any multiplication or division problem, highlighting word problems. Students will develop more efficient strategies and work toward automaticity. Just a reminder, fact fluency is a key building block for future topics throughout the year and beyond. Just a couple minutes of reinforcement with multiplication and division facts each night could greatly benefit your child in the upcoming units.

ADVANCED MATH with MS. LESCHER: Next week we will begin working on telling time to the nearest minute and elapsed time. Many students are not familiar with using an analog (not a digital) clock and may need review at home with telling time to the hour, half hour, and the nearest 5 minutes. They will need lots of practice with elapsed time using an analog clock. Please have your child show you their example of elapsed time on SeeSaw. Practice at home is helpful. Thank you.

ACCELERATED MATH with MS. BLOUNT: Students will continue studying OA.5 where the students identify and replicate patterns and rules with both shapes and numbers. Students will learn pattern as the actual sequence where the rule refers to how the pattern is dictated. We will explore T charts and in and out boxes as tools to help us master this standard.

Reading

In reading this week, we will be finishing up our mystery units! The final bend in this unit works on applying all the close reading, predictions, and inferencing skills we have built thus far to all fiction books. We will solve mysteries that relate to the character and plot of any fiction books and use clues (text evidence) to drive our predictions. For grammar, we will also be studying concrete, abstract nouns and irregular plurals. Concrete nouns are tangible and abstract nouns are more feeling and thought based. An irregular plural refers to a noun you do not add the -s suffix to make it plural, i.e. child and children.

Writing

In writing this week, we will focus heavily on getting our final pieces ready for publication. We will work on punctuating paragraphs and drawing on all the knowledge we have learned from across the unit to our publications. We will revise from our self-assessments using our editing writing checklists and other tools to make our writing the best it can be!

Social Studies

This week students will review and test on all they learned about European explorers the past two weeks. Your class test date will be written in your student agendas.
